**GROUND GAS PROTECTION GP® PROTECTION BOARD** TECHNICAL DATA SHEET

GP® PROTECTION BOARD is a tough, hard wearing protection board with a high compressive strength, and impact resistance. GP® PROTECTION BOARD is designed to protect JUTA membranes from concrete reinforcement, back fill and follow on trades (including light traffic).

**Benefits** 

For developers of brownfield and contaminated sites the TITANTECH® family of products represent a major step forward in safeguarding projects against gaseous and chemical contamination.

**TITANTECH®** 

- · A tough, hard wearing, flexible polymeric board for protecting ground gas and waterproofing membranes against mechanical damage, pedestrian or vehicular traffic and abrasion caused by backfilling.
- · Protects against ground salts and most corrosive chemicals.
- · Light and easy to handle: allows ease of storage, carrying and positioning on site.
- Provides protection to JUTA UK membranes.
- · Easily cut and shaped on site.
- · Easily scored and folded for continuous protection at corners.
